

New Holland Dealers:

SCHEDULE YOUR CLINIC NOW!

Hay preservative and bale identification clinics are an effective way for dealers to build their business base for New Holland® CropSaver™ and CropID™ products. Here is a program offering full support to dealers who conduct a clinic and support the current "Field to Feed" program with New Holland.

The "Free Drum" program As in years past, customers who order an automatic hay preservative application system at a New Holland dealer clinic from October 17, 2011 to May 15, 2012, will receive a FREE 50-gallon drum of hay preservative with their order.

The New Holland CropID bale identification system allows your customers to manage their crop like never before! To help customers get started, all orders for CropID systems taken at dealer clinics will also qualify for a FREE roll of tags.

A CropSaver/CropID clinic is a great way to establish or increase sales on hay preservative and application systems with your hay-producing customers. And, conducting a customer clinic in conjunction with the free drum promotion provides you a valuable tool to close the sale on an automatic hay preservative application system!

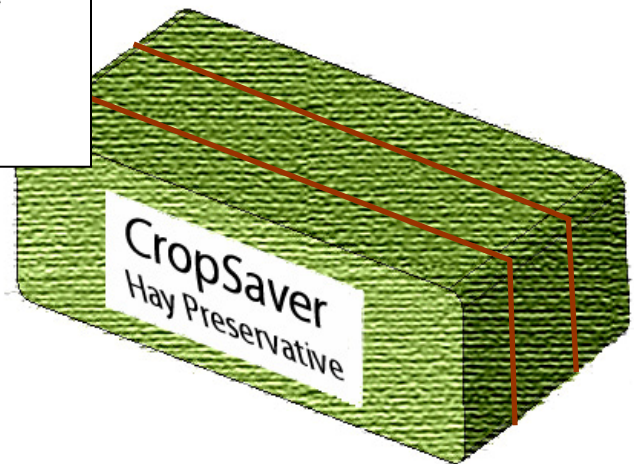

The Free Drum Promotion will be also be advertised in January and February editions of major farm publications. These advertisements will promote Harvest Tec and your customer clinics.

Harvest Tec, the manufacturer of New Holland CropSaver hay preservative, CropID bale identification system, and preservative application systems, would like to help you arrange your customer clinic. If you are interested, fill out the following form and fax or mail back to Harvest Tec.

What Harvest Tec will provide to help promote your clinic:

1. Dealer pre-clinic package. About a month before the scheduled clinic, Harvest Tec will send a promotional package for use at the dealership. The package will include a choice of a 3' x 6' CropSaver banner or an inflatable 14" x 18" x 36" hay bale featuring the CropSaver logo. Also included will be invitations to send to your customers inviting them to the clinic. Be sure to display either the banner or the hay bale and send out invitations to promote your clinic!

*Sample of CropSaver banner and
CropSaver bale*

2. Harvest Tec Product Specialist. A Harvest Tec specialist will attend your clinic and provide a 1-2 hour information session on the use of CropSaver hay preservative, the automatic application system, and/or the CropID bale identification system. They will provide an informative hands-on display of the system as well as answer any questions that your customers may have during the clinic. If Harvest Tec is unable to attend due to prior booking, your PSSM will need to be available for the clinic.

3. Free drums and/or free rolls of tags. Use the free drum and/or free tag offers to get your best customers to attend the clinic. This promotional value will help your dealership generate sales during the clinic, and will help you gain future and reoccurring sales.

4. Free Web Advertising. Your clinic date and location will be listed on the Harvest Tec website.

5. Promotion of the New Holland "Field to Feed" promotion. Harvest Tec will assist promoting the current "Field to Feed" promotion with advertisements in hay and forage publications.
